

FORMULA ZYNERJI — BLOCKCHAIN SPINE, SELF-BALANCING ECONOMY & REVENUE

A. ON-CHAIN LEGALITY (only on-chain parts may run — M10)

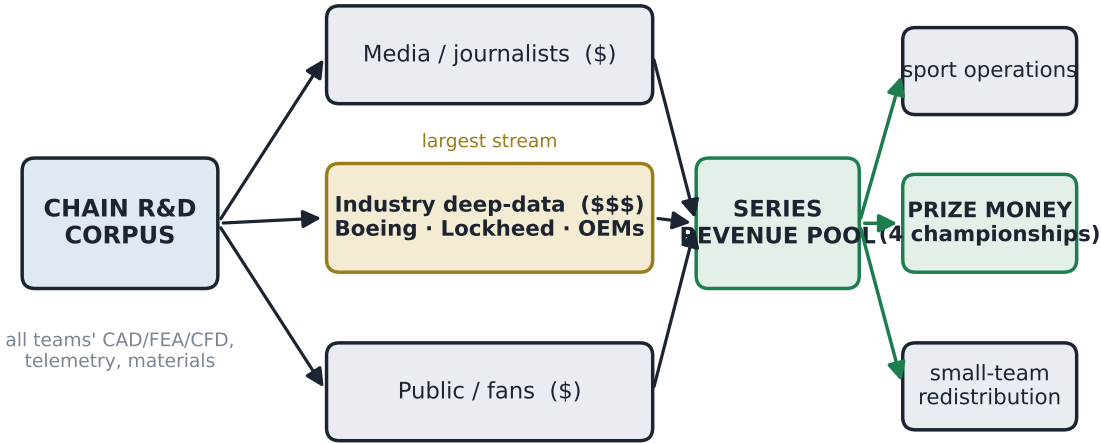

B. THE SELF-BALANCING ECONOMY (no tokens, no auction, no handicap)

Leverage: cap (M1, \$75M) bounds spend · floor (M12, 80% of cap) forces innovation · championship pulls all to the best on-chain parts.

C. REVENUE — the shared R&D corpus is a product that funds the sport

Competitors get the data free (disclosure = how they compete); non-competitors pay. More innovation → more valuable corpus → bigger prize fund.
